

# TRY MAGNESIA FOR STOMACH TROUBLE

It Neutralizes Stomach Acidity, Prevents Food Fermentation, Sour, Gassy Stomach and Acid Indigestion

Doubtless if you are a sufferer from indigestion you have already tried peppermint, bismuth, soda, charcoal, drugs and various other remedies, and you know these things will not cure your trouble—in some cases do not even give relief.

But before giving up hope and deciding you are a chronic dyspeptic just try the effect of a little bicarbonate of soda—not the ordinary commercial carbonate, citrate, oxide or milk, but the pure bicarbonate of soda which you can obtain from practically any drug store in either powdered or tablet form. Take a teaspoonful of the powder or two compressed tablets with a little water after your next meal, and you will find a difference in the way your stomach feels. It will instantly neutralize the dangerous, harmful acid in the stomach which now causes your food to ferment and sour, making gas, wind, flatulence, heartburn and the bloated or heavy, lumpy feeling that seems to follow most everything you eat.

You will find that provided you take a little bicarbonate of soda immediately after a meal you can eat almost anything and enjoy it without any danger of pain or discomfort to follow, and moreover, the continued use of the bicarbonate of soda cannot injure the stomach in any way so long as there are any symptoms of acid indigestion.
